AMENDMENT AFTER FINAL

ASSISTANT COMMISSIONER OF PATENTS AND TRADEMARKS  
WASHINGTON, D.C. 20231

SIR:

In response to the Official Action dated December 31,  
1995, please amend the above-identified patent application as  
follows:

IN THE SPECIFICATION

Page 5, prenumbered line 2, insert --When the one or more  
primitives and subprimitives are grouped, either a polygon or  
a wireframe part is generated as the result. If the  
definition of the polygon is not planar, it will be grouped as  
a sweep polygon automatically. A sweep polygon is defined by  
two sets of lines and arcs, each element in one set is  
parallel to a mirror image element in the other set, and the  
sets are connected by a single edge describing the thickness.  
Sweeps may also be created implicitly, as part of a thickened  
polygon.
